vision&mission

Vision

Embrace the new building, enjoy
a wonderful life

Mission

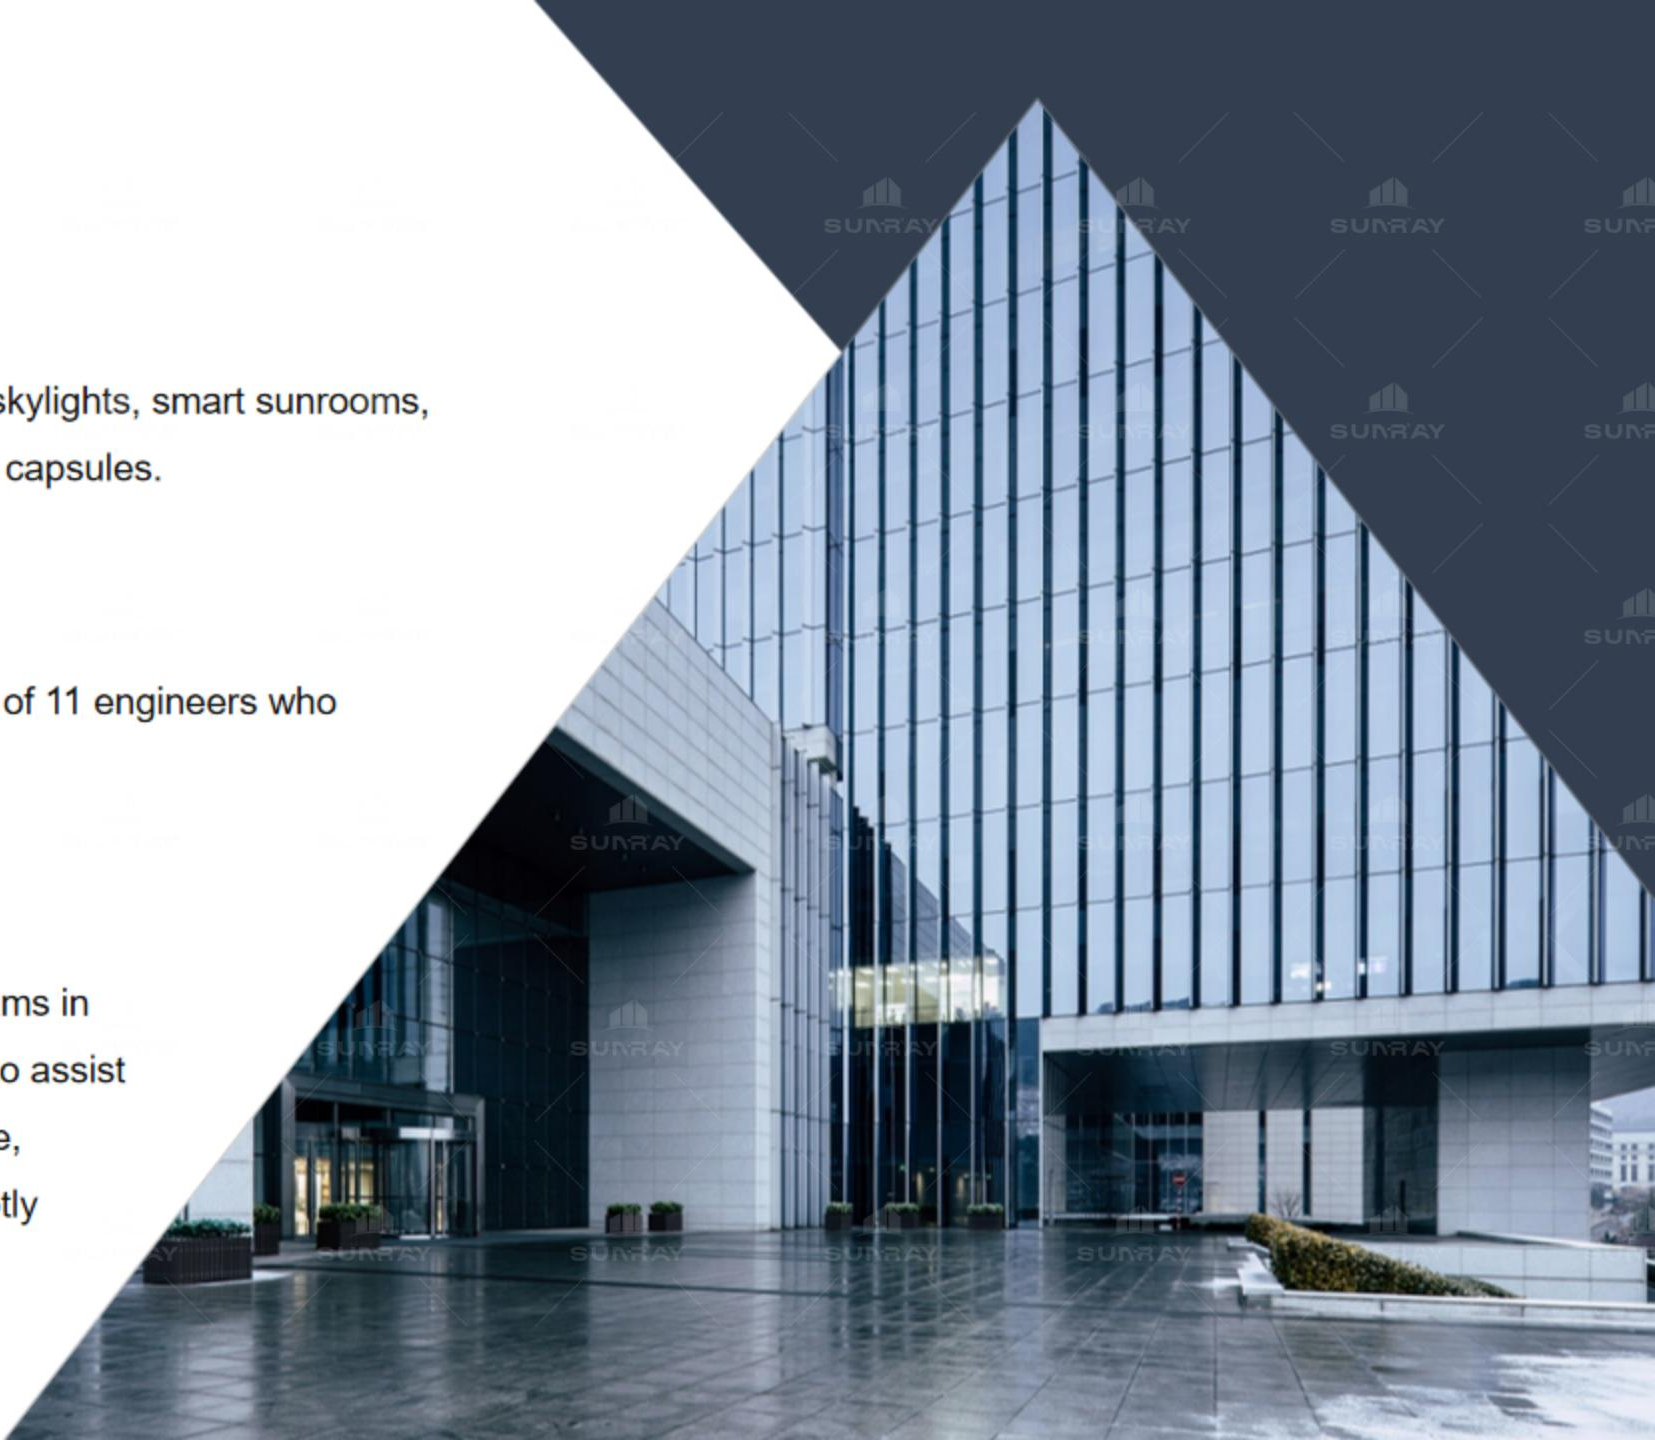

Our mission is to bring sunshine
and fresh air into every building ,
every home, and every corner,
creating a harmonious and
beautiful intelligent world where
humans and nature coexist.

Service capabilities

01 1.We have 6 factories for sunrooms, skylights, smart sunrooms, pavilions, windows and doors , space capsules.

02 2.Our design and R&D team consists of 11 engineers who can provide solutions within 1 day.

03 3.We have agents and installation teams in various continents around the world, to assist customers in reducing installation time, lowering installation costs, and promptly addressing after-sales issues."

Our strength

Brand Story

2010

After ten years of hard work, SUNRAY has gradually established its brand image and started to gain recognition in the domestic market. The number of employees has increased to about 100, and the team continues to grow.

2005

The first production plant was established, and independent production was initially realized, which improved product quality and production efficiency. Advanced production equipment was introduced, and professional production lines were set up to further enhance production capacity.

2000

Driven by market demand, SUNRAY was formally established in 2000, dedicated to providing high-quality intelligent sunlight buildings and entering the door and window industry.

Brand Story

To tade

The total number of employees has reached 317, forming an efficient and professional team. Products are sold to more than 60 countries and regions around the world, and brand awareness continues to rise.

2020

Establish five production plants to meet the growing market demand. Invest in research and development, launch a number of innovative products, and further enhance market competitiveness.

2015

We have begun to sell our products to more than 60 countries and regions around the world, and our brand influence has been significantly enhanced. At the same time, the number of employees has increased to 200, and we have successfully established a research and development laboratory to support innovation and product development.

A modern sunroom with a glass roof and walls, featuring wooden chairs, a table, and a lounge chair. The room is bright and airy, with a view of a green lawn and trees outside. The text '02' is displayed in white on a dark blue background.

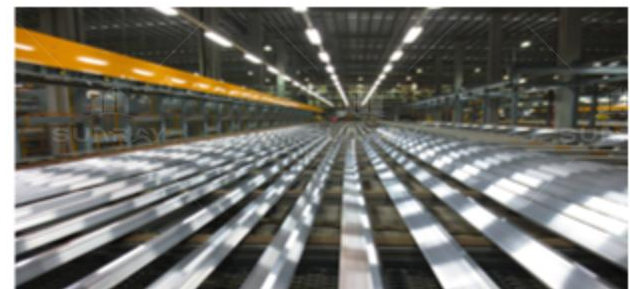

02

WORKSHOP

01 Aluminum workshop

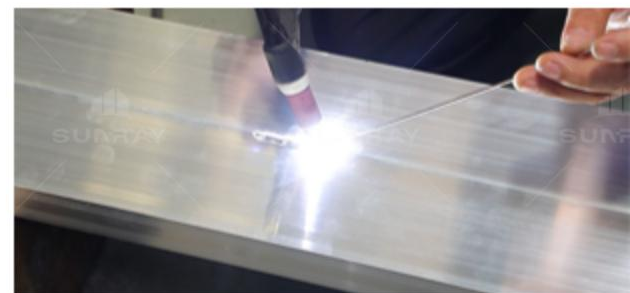

The total area of the aluminum production workshop is **10,000 m²**. The workshop is equipped with **2** large furnaces, **3** casting machines, **3** heat treatment furnaces, **5** extruders, **1** cooling system, **2** cutting machines, **2** surface treatment equipment, and **15** testing equipment. They work together efficiently. It only takes **1** day from raw materials to finished products. The monthly output is **800** tons, and the product qualification rate reaches **99%**.

02 Processing workshop

The total area of the processing workshop is **8,000m²**, with **120** technicians and the **6S** workshop management model. It only takes 10 days to cut, punch, weld and assemble profiles. The first-time pass rate of the product reaches **99%**, and the monthly production capacity reaches 1 million US dollars.

03 Spraying workshop

The spraying workshop has a total area of **2,000m²** and has **40** technicians. The production line is worth **5** million yuan and adopts the **6S** workshop management model. It takes **4** days from cleaning and oxidation to final packaging. The product pass rate reaches **99%** at one time and the monthly production capacity reaches **1,000** tons.

04 Assembly workshop

The total area of the assembly workshop is **11,000 m²**, with **80** technicians and standard production processes. It only takes **1** day from assembling the frame, installing the sealing strip, installing the glass panel, fixing the glass to testing and debugging. The product pass rate reaches **99%**, and the monthly production capacity reaches **125** sets of skylights.

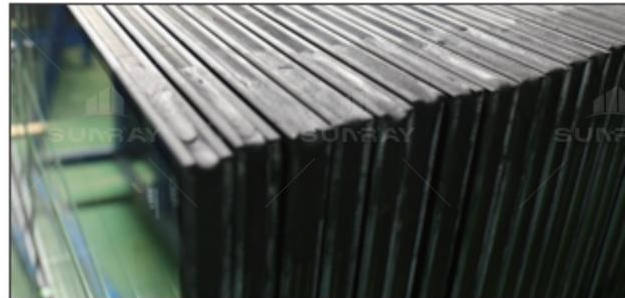

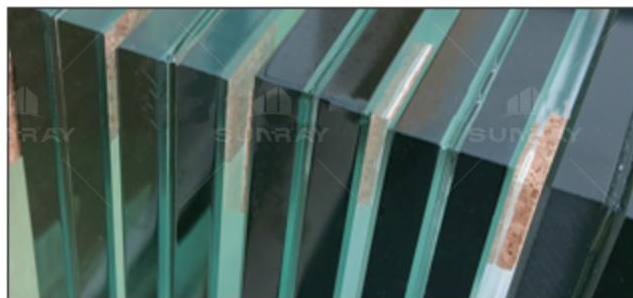

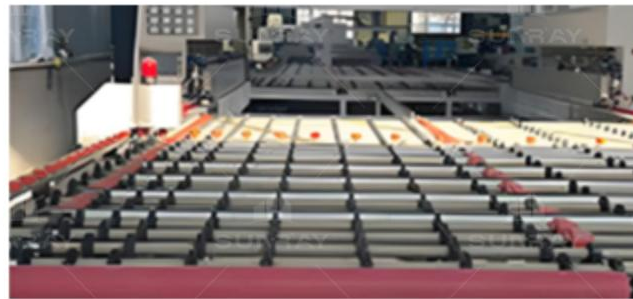

05 Packaging workshop

The total area of the packaging workshop is **9,000 m²**, which can accommodate more than **1,500** sets of products at the same time. It is equipped with **2** large-scale transport equipment to support simultaneous loading and unloading to ensure efficient logistics. The workshop has **45** technicians, **1** large lifting equipment, and **3** professional forklifts to ensure the smooth packaging and transportation process and ensure that the products are delivered to customers in a timely manner.

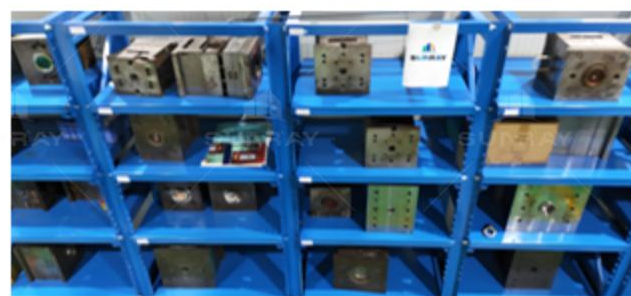

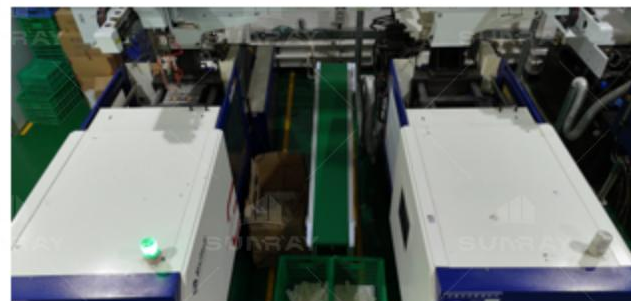

06 Glass workshop

The glass factory has an 8,000m² production workshop and professional independent manufacturing capabilities. Its products include LOW-E glass, insulating glass, laminated glass, tempered glass, etc. From cutting of original glass to polishing and then to making different types of products according to different customer needs, there are corresponding industrial lines. The factory has its own factory to strictly control product quality.

07 Motor workshop

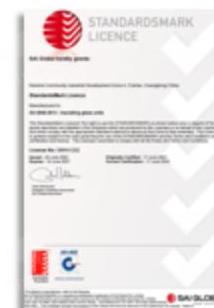

The motor workshop has a total area of **4,000 m²**, is staffed by **18** professional technicians, and has a number of national patent technology certifications. The motors produced in the workshop use a self-developed high-precision machined specially designed gear reduction mechanism, which has excellent meshing quality and extremely quiet working principle. Its design can not only perfectly adapt to smart doors and windows such as electric up and down opening windows and mobile sun rooms, but also can operate stably in various extremely harsh environments.

WHY CHOOSE US

WHY CHOOSE US ?

Because we are one of the largest door and window manufacturers in China

-  1. One-Stop Service, Global Window and Door supply.
-  2. Free Design, Quickly generate renderings on demand.
-  3. After-sales service, Five-year warranty, lifetime guarantee.
-  4. Localization Services, We have agents and installation teams on every continent.
-  5. Powerful full customization capabilities, Own production plant, 25 years of industry experience, 20-member technical team.

>

China's largest door and window manufacturer

We are China's largest door and window manufacturer, with hundreds of styles and a monthly output of 200 sets. We are the supplier of the largest door and window seller in the Middle East, accounting for 85% of the Middle East market.

Digital production workshop

Digital production workshop strictly controls human efficiency, quality efficiency, cost efficiency, machine efficiency and flat efficiency to reduce costs and benefits customers.

<

>

300+ employees, 6 factories

We have strong production capacity and can efficiently meet large-scale order needs. We have rich industry experience covering multiple areas such as design, production, quality control and customer service. We can complete orders in a short time and ensure efficient product delivery.

Technology

We have an excellent R&D team with 18 structural engineers, 7 appearance engineers and 13 packaging engineers. So our implementation capabilities are strong. New product development and regular product upgrade cycles are 1/3 of the industry standard.

Space solutions: 30 designers and 200 design solutions are available, and overall photos and quotes can be completed within 24 hours.

We have innovative technology and talents, hold 160+ patents, and are the founders of motor technology and extremely narrow door and window design.

The image shows a bright, modern interior space with a light-colored wooden floor and large glass windows. The windows offer a view of a body of water and a distant shoreline with a small building. A semi-transparent banner is overlaid across the middle of the image, containing the text '10 PRODUCT'. The number '10' is white and set against a dark blue parallelogram background, while the word 'PRODUCT' is in bold black letters. The background image has a repeating 'SUNRAY' watermark pattern.

Sliding window

The sliding window adopts innovative slide design, smooth and labor-saving operation, excellent sound insulation and heat preservation performance, creating a comfortable and quiet home space for you.

Open

Close

Folding window

Folding windows that open and close flexibly, showing the aesthetics of space and excellent performance.

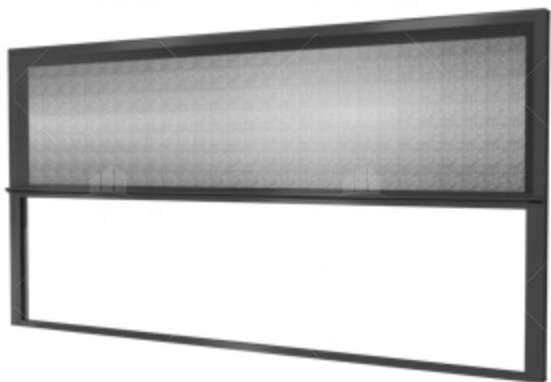

Electric sliding window

Innovative electric sliding window system, intelligent drive and smooth operation, perfect integration with the building façade, creating modern space light and shadow art.

Electrical balcony window

Intelligent electric window lifting system, vertical opening and closing smoothly and quietly, breaking through the space limitation, reshaping the building light and shadow interface.

Fold up window

Precision guide rail folding system, vertical lifting and opening and closing freely, breaking through the traditional limitations of the window type, realizing the intelligent regulation of space and light.

Lift window

Precision guide rails lift up and down the window system, vertical operation is smooth and steady, optimizing space utilization and achieving an efficient balance of ventilation and lighting.

Swing door

Flush door system, precision hinges are stable and durable, and the large-size opening design realizes efficient circulation of space and safety protection.

Open

Close

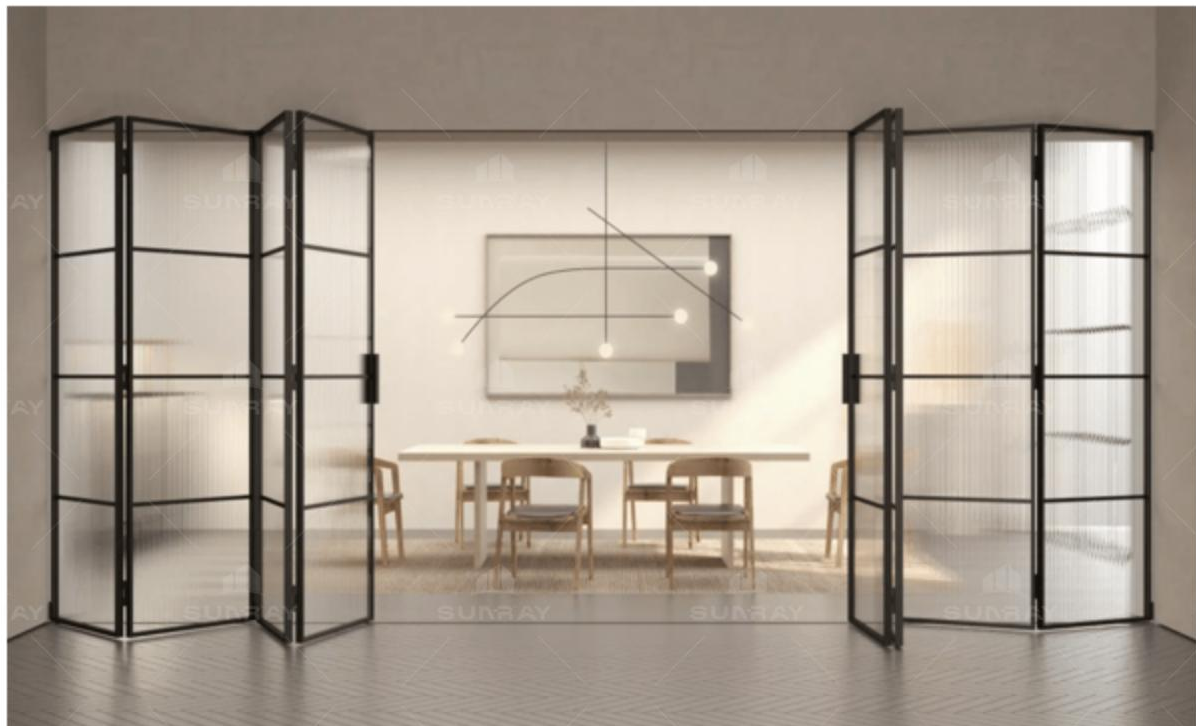

Open

Folding door

The fan-linked folding door system, which opens and closes freely at 180 degrees, breaks through spatial boundaries and creates a flexible and permeable modern architectural interface.

Wooden door

Selected natural solid wood door system, environmental protection technology refined, excellent sound insulation and thermal insulation performance, to create a safe and comfortable high-quality living space.

Entrance door

Armor-grade entry security door system, multi-layer composite protection structure, intelligent security technology integration, guarding home security first line of defense.

Aluminium alloy shutter door

High-strength aluminum alloy rolling door system, military-grade guide rail for smooth operation, intelligent linkage control technology, providing all-weather security for the garage.

Product accessories

External sunshade

Heat insulation and cooling, upgraded comfort, bringing the most comfortable environment to your home regardless of hot sun or rainy season

Built-in sunshade

Invisible shading, does not take up space, and can easily adjust the light, bringing a more comfortable and private living experience.

Patented motor

Innovative technology, unlimited power, leading technology, ensuring stability and efficiency at every moment

Glass glue gun

Smooth glue discharge, stable control, easy to complete detailed construction, saving time and effort

Glass glue

Glass glue, perfect sealing, waterproof and moisture-proof, always protect your home.
