Tapping into the international market, diversifying product integration, and expanding new business tracks.

6

2023-2025

ABOUT US

Our strength

Why choose us

01

Good price

Factory direct supply, optimal cost control.

02

Fully customized capabilities

Accurately matching needs from size to function.

03

On-site Measurement

Professional team on-site measurement, to avoid the specification error error period.

04

On-site Installation Guidance

Standardize construction, improve efficiency and reduce costs.

05

Complimentary Designs

Customized solutions + effect previews to fit the needs and reduce the risk of decision-making.

06

Engineering Teams

Specialized stress structure analysis to ensure safety and assist in rapid closing

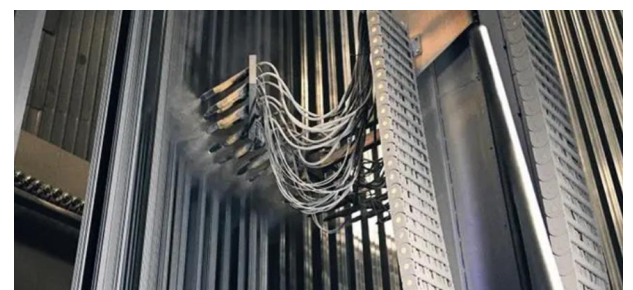

02

WORKSHOP

01 Aluminum workshop

The total area of the aluminum production workshop is **15000 m²**. The workshop is equipped with 2 large furnaces, 3 casting machines, 3 heat treatment furnaces, 5 extruders, 1 cooling system, 2 cutting machines, 2 surface treatment equipment, and **15** testing equipment. They work together efficiently. It only takes **1** day from raw materials to finished products. The monthly output is **800** tons, and the product qualification rate reaches **99%**.

02 Glass workshop

The glass factory has an **1,0000m²** production workshop and professional independent manufacturing capabilities. Its products include LOW-E glass, insulating glass, laminated glass, tempered glass, etc. From cutting of original glass to polishing and then to making different types of products according to different customer needs, there are corresponding industrial lines. The factory has its own factory to strictly control product quality.

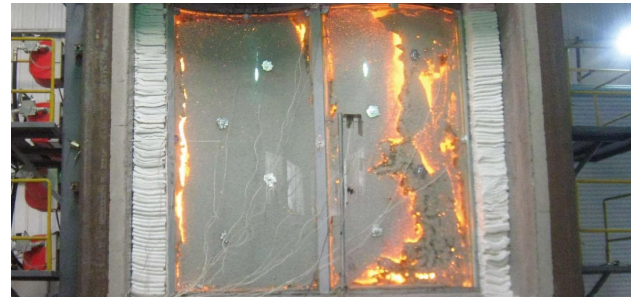

03 Assembly workshop

The total area of the assembly workshop is **11,000 m²**, with **80** technicians and standard production processes. It only takes 1 day from assembling the frame, installing the sealing strip, installing the glass panel, fixing the glass to testing and debugging. The product pass rate reaches **99%**, and the monthly production capacity reaches **125** sets of skylights.

04 Testing Center

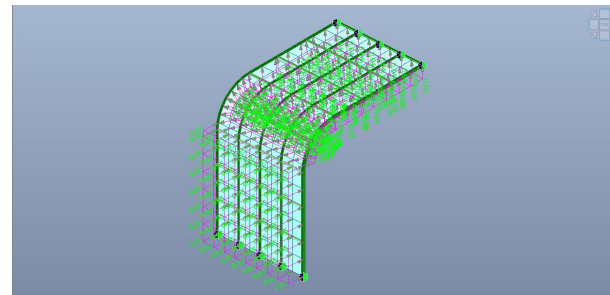

We are proud to be the first laboratory in Hong Kong dedicated to independent quality assurance and testing services for curtain wall and fire resistance systems as well as fire proofing materials in building construction. Our team is led by specialists in the field with doctoral degrees in civil, structural or mechanical engineering who individually hold many years of experience in advanced testing for building structures and fire engineering.

05 Plant technology

Our team is divided into two major teams, technical and engineering, with a division of labor. The technical team is responsible for profile and glass testing and issuing force reports to ensure the quality and safety of the project; the engineering team focuses on on-site landing and is responsible for measuring and installation to ensure the project progress.
