Sunroom type

FOSHAN SUNRAY WINDOWS LIMITED COMPANY

Is a leading global provider of comprehensive solutions and infrastructure for intelligence sunlight buildings (ISB).

Built-In Sunshade

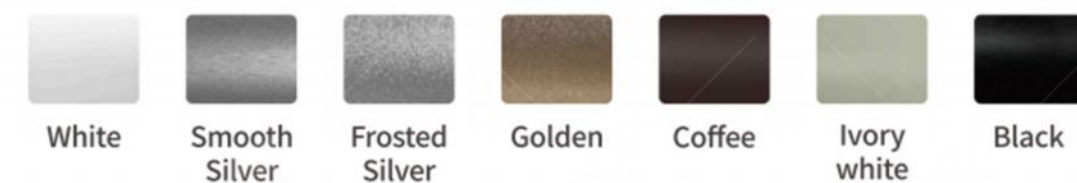

Sunshading Blinds

There are two types of built-in, one is installed in the interior of the sunroom and the other is installed in the glass interlayer of the sunroom to block sunlight, protect privacy or regulate indoor light. This type of curtain generally consists of a set of adjustable angle louvers, by adjusting the angle of the louvers, you can control the light intake and block the direct sunlight.

● Aluminum Frame Color Card

● Shutter Color Card

External Sunshade

Windproof Rolling shutter

Windproof roller blind is a special kind of window blind, mainly used for sunroom exterior. Its main functions are windproof, sunshade, heat insulation and decoration.

Aluminum Canopy

It is usually used on top of sunrooms to provide shade, sun protection and heat insulation. This canopy is made of aluminum alloy, which has good weather and wind resistance properties and can adapt to the outdoor environment.

INDOOR COMFORT, OUTDOOR FREEDOM

Libart retractable buildings open new doors for the hospitality industry. Glass vertical walls and translucent PC roof glazing provides unmatched air of spaciousness when closed, and within minutes it can be opened to provide complete outdoor café environment.

For this project, owners were able to get necessary permits from the local municipality, in an area where no commercial buildings were allowed because Libart's retractable systems are designed to open completely and when necessary can be moved, like a giant umbrella (temporary but not in convenience). Libart's retractable buildings which technically known as Free-standing retractable structure provide superb environments for restaurants and cafés. Convenience and comfort that is virtually impossible with tenants or other similar fabric structures.

Experience the Perfect Blend of Luxury and Nature

We are thrilled to introduce you to AER, the exquisite rooftop bar at the Four Seasons Hotel Mumbai. AER is designed to provide an unforgettable experience by combining the best of luxury and nature. We are excited to share with you our latest addition to this remarkable space – Libart's LeanTo Retractable Systems.

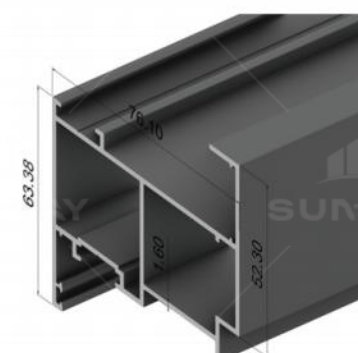

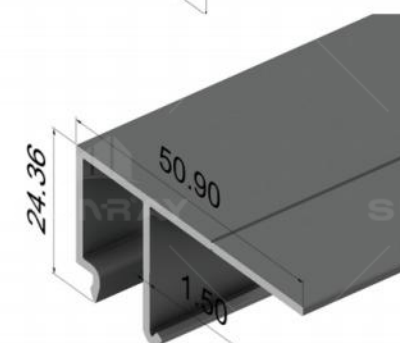

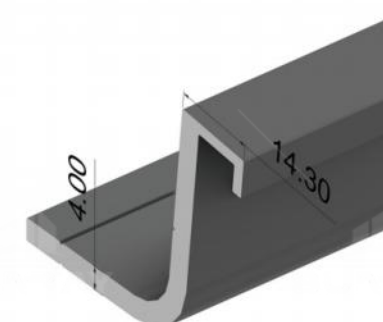

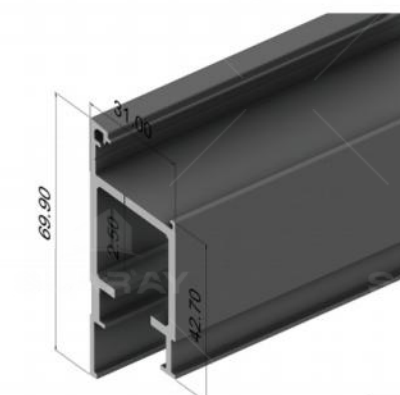

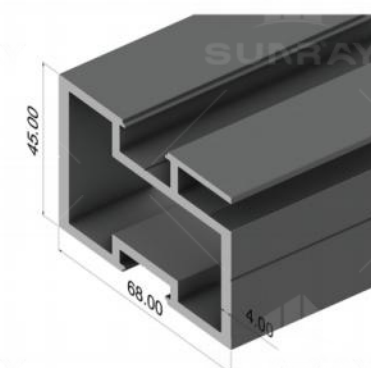

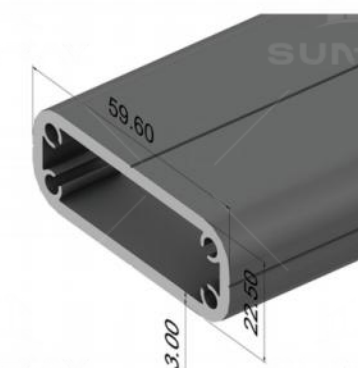

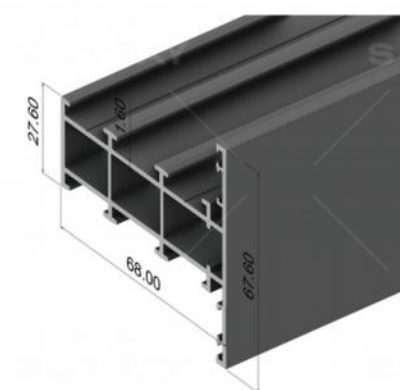

Imagine being able to enjoy the breathtaking Mumbai skyline while sipping your favorite cocktail, with the gentle breeze caressing your face. Our goal was to create an atmosphere that allows you to immerse yourself in the beauty of nature, without compromising on comfort. With the Libart's LeanTo Retractable Systems, we have achieved just that.

The LeanTo Retractable System is a remarkable innovation that can be closed in just two minutes when the weather turns rainy. It ensures that you and your guests remain dry and comfortable, allowing you to continue your conversations and enjoy the ambiance, regardless of the weather conditions. On sunny days, the system can be effortlessly opened, allowing you to bask in the glorious sunshine and breathe in the fresh air.

Pool cover

A pool cover helps prevent children, pets, or unauthorized individuals from accessing the pool area, reducing the risk of accidental drowning.
